### REDUCTION IN CAR LICENSES URGED BY ALTA MOTOR CLUB

Action by the Provincial Govern-  
ment to make 1936 motor car li-  
censes good until April 1 1937, will be  
urged by the Alberta Motor Associa-  
tion.

Under legislation passed at the  
last session of the Alberta legisla-  
ture, the next license year will com-  
mence on April 1 and not January 1,  
as in past years.

As there is a period of three months  
between, the A. M. A. contends that  
the province should not impose a li-  
cense charge for that time, which  
would mean that the 1936 licenses  
would hold good until April next.

Having urged for many years that  
the license year should open on April  
1, the motor organization feels that  
there will be increased gasoline tax  
and the revenue to the province in the  
three months period following Jan. 1,  
which offset to a large extent any  
loss from licenses.

Making still another bid in the in-  
terests of motorists, the A. M. A. also  
is urging the government to reduce  
the license fees on cars with increased  
wheel base. A special committee is to  
place the case for the motor organiza-  
tion before the authorities.

It has been contended frequently  
that the license scale works unfairly  
on the car with the larger wheel  
base, and is due for a revision down-  
ward.

### CANADA'S WHEAT SHOULD BRING OVER \$1.80 A BUSHEL

Canada's current wheat crop should  
bring a price well over \$1.80 a bushel  
in the opinion of Hon. R.B. Bennett,  
leader of the opposition in the federal  
government, as expressed in Calgary  
on Saturday, July 18 in an interview  
with The Calgary Herald. Mr. Ben-  
nett pointed out that world reserves  
of wheat are now down to 635 million  
bushels as compared with 1,100 mil-  
lion two years ago on the same date.  
The present world carry over is the  
smallest in nine years.

Nine years ago, the Ex-Premier  
pointed out, wheat was \$1.50 per bu-  
shel and gold was valued at \$20.07  
an ounce. \$1.00 wheat was then re-  
garded as cheap wheat. The lower  
price in recent years has been attrib-  
uted to excessive wheat production.  
The excess has now been removed  
and should be no longer a menace to  
the price structure.

Hon. Mr. Bennett thought that  
87½¢ minimum price for the 1936  
crop would be a moderate one in  
view of the much improved wheat  
situation and the small crop in West-  
ern Canada.

During an intense love scene when  
the hero was doing his stuff, wife  
"wired" other husband and said:

"Why is it that you never make  
love to me like that?"

"Say," she replied, "do you know  
the salary that guy gets for doing  
that?"
